(54) Title: SHOCK HAZARD PROTECTION SYSTEM

(57) Abstract

New device for protecting human life and property against electrical shock and more specifically to a shock hazard prevention system for disconnecting an electrical load from an electrical source when a shock hazard condition exists within the load. According to the invention, the installation comprises a source operatively connected to a load by first (110) and second (120) conductors, a detector (200) associated with the load, a control circuit (300) connected to the detector by a sensing or third conductor (130), and an interruptor circuit (400) associated with the source and connected to the control circuit (300).
